

# Stepping Stones ABA, Inc.

## Positive Behavior Supports Consult

**SSABA Positive Behavior Supports Consult** permits access to service delivery using an integrated approach individualized to core needs that aren't essential for intensive behavior modification therapeutic services.

All Consults are conducted by a Board Certified Behavior Analyst (BCBA)

### Consult & Record Review

Review of all previous assessments conducted, reports, IEPs, medical records, etc.

### In-Person or Telehealth Interview

Observation & interview with the family and your child.

*\*Due to COVID-19, Telehealth options may primarily used*

### Formal Report

Includes professional recommendations utilizing behavior modification techniques families implement independently. If further assessing is recommended this guidance will be outlined and provided to the family based on ethical and objective analysis.

The **PBS Consult** involves professional consultation services with a BCBA in relation to primary areas of concern. Upon completion of the consult, families will obtain a formal report outlining specific recommendations based on Applied Behavior Analysis (ABA) techniques to address these areas on a day-to-day basis.

Obligation for continued services is not required, however, additional service options are available. If further recommendations for direct ABA Services are deemed appropriate based on initial evaluation, a formal recommendation will be provided.

The PBS Consult will not evaluate and assess behavioral concerns that would warrant formal assessing (e.g., **\*\*FA**, **\*\*FBA**).

**\*\*Functional Analysis**

**\*\*Functional Behavior Assessment**
